Handcrafted New Chinese Style Flowing Water Table

Project: Tea Space · Custom Flowing Water Table

Client Need

An Eastern-inspired tea space needed a table that was both functional and visually striking—quiet water flow, soft curves, and a landscape aesthetic.

Custom Solution

Inspired by "flowing cups along a winding stream," we crafted an organic curved table:

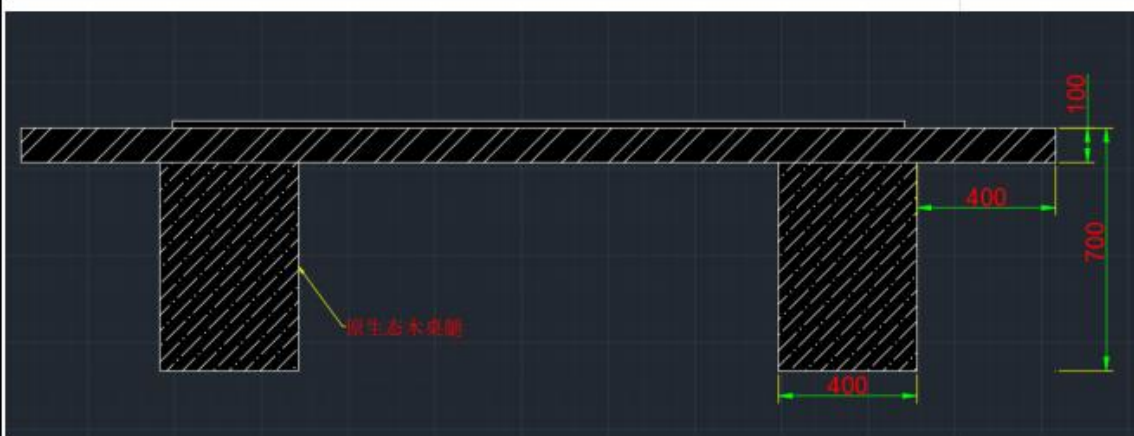

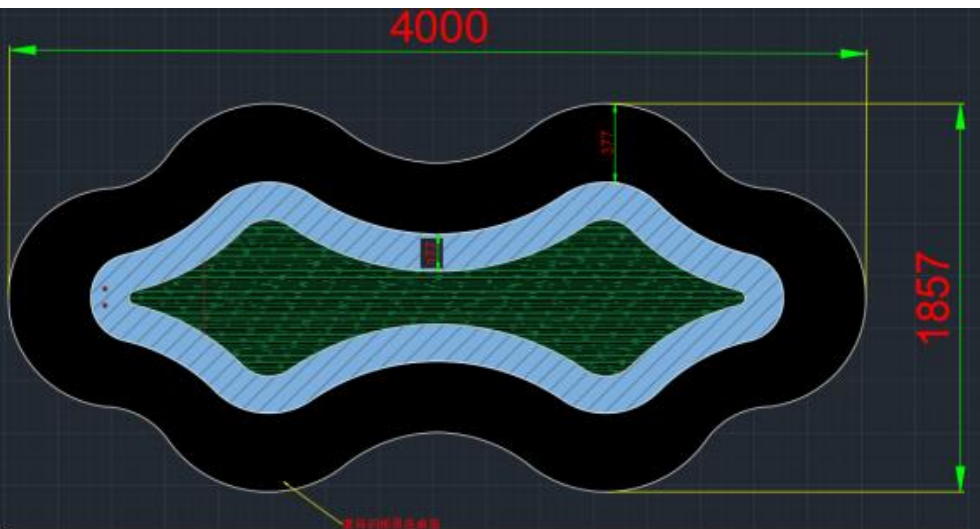

- Dark grey matte top, hand-polished, seamless curves
- Hidden water circulation, quiet and natural
- Embedded moss, plants, rocks, and lotus accents
- Paired with calligraphy curtains and lanterns for a full Eastern atmosphere

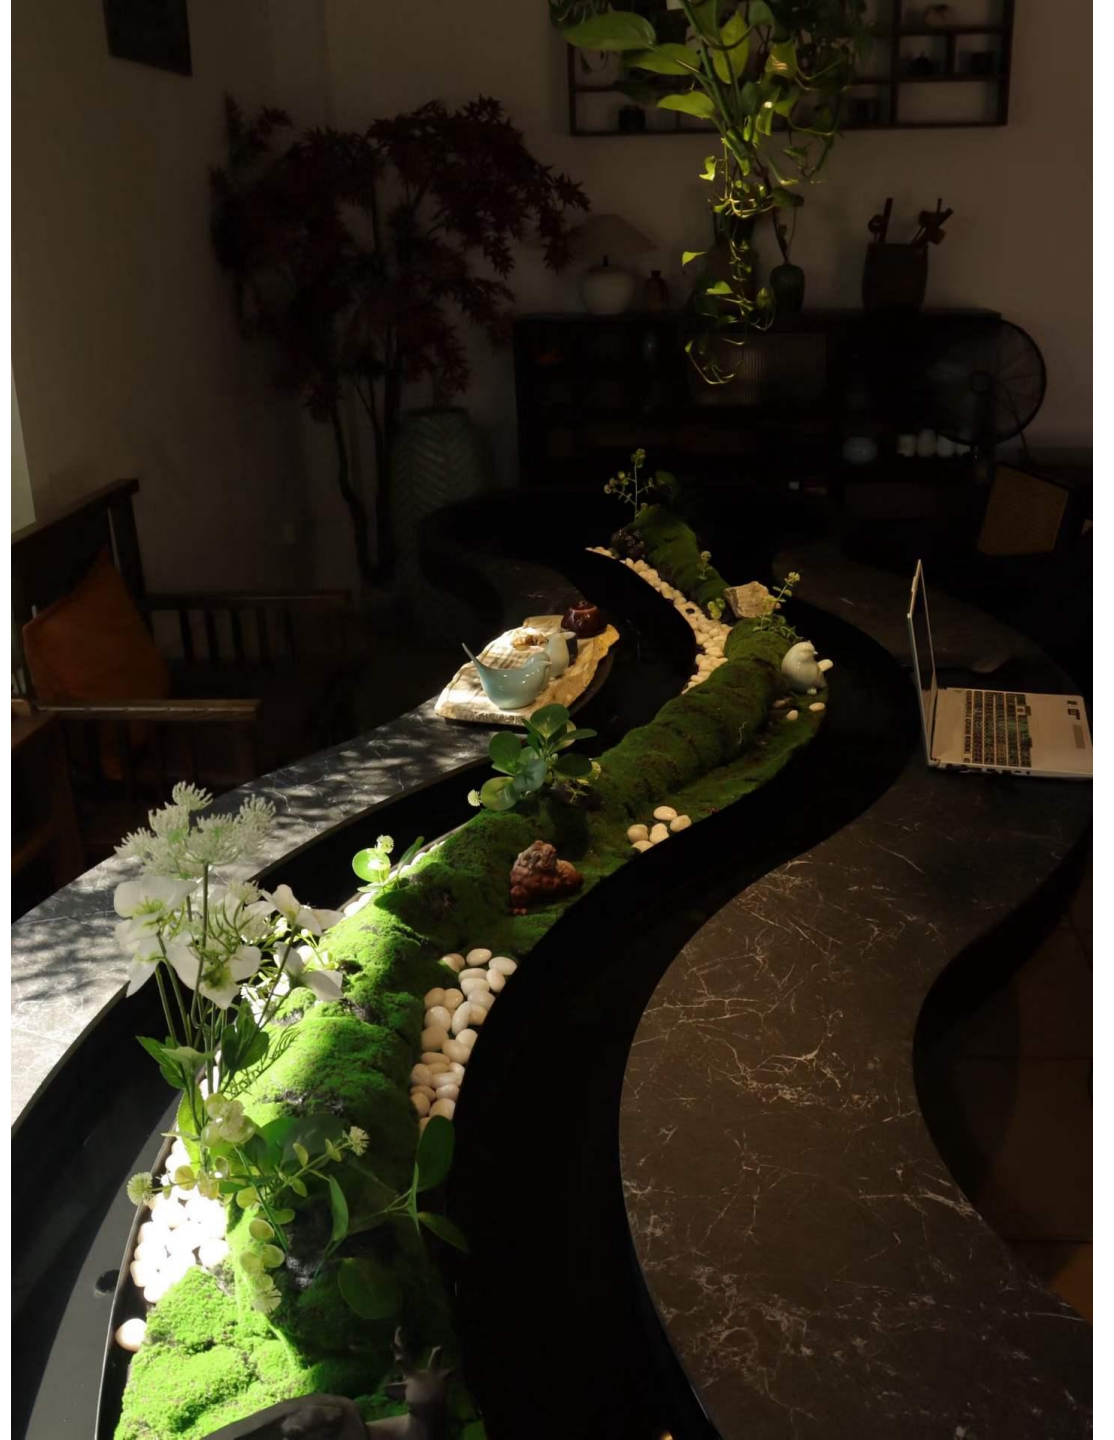

Results

- Custom timeline: **25 days**
- Became the visual centerpiece of the tea space; guests often stop to photograph it
- Client later ordered a matching series of smaller flowing water pieces

Client Feedback

"This isn't just a table—it's the soul of the space."

Title: Airport Terminal Charging Bar Counter _Subtitle: Australia · 2026

Background

- Client: Australian airport commercial space provider
- Need: Charging bar counter in waiting area, balancing function & quality

Requirements

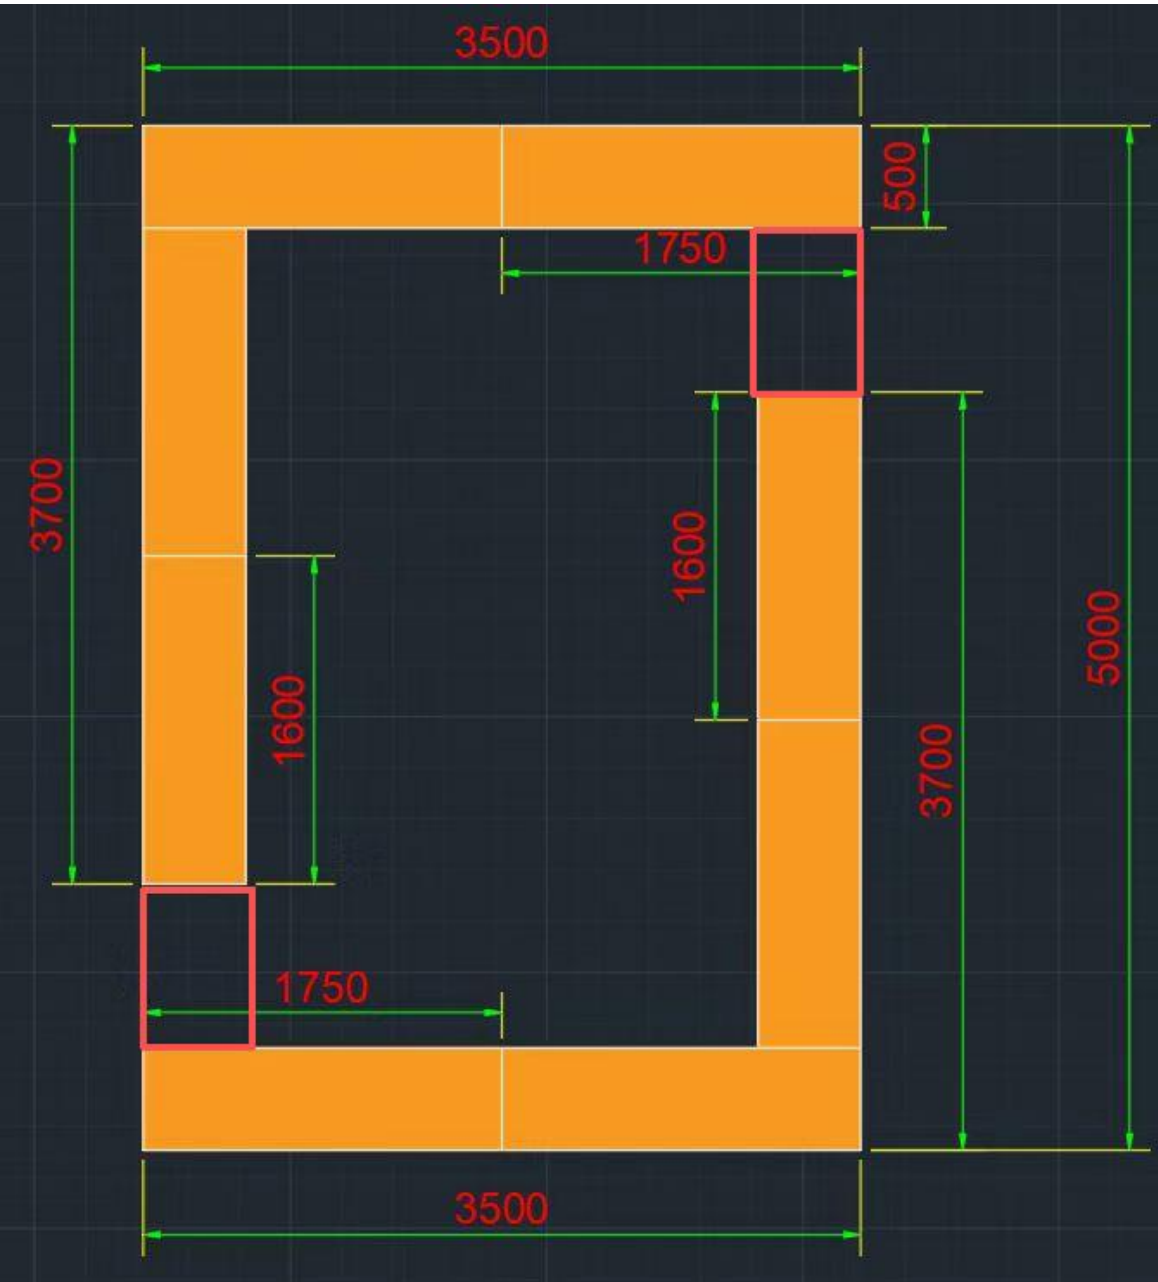

- Utilize corner space
- Power + USB at each workstation
- Wear-resistant, easy-clean, airport VI compliant
- Tight lead time

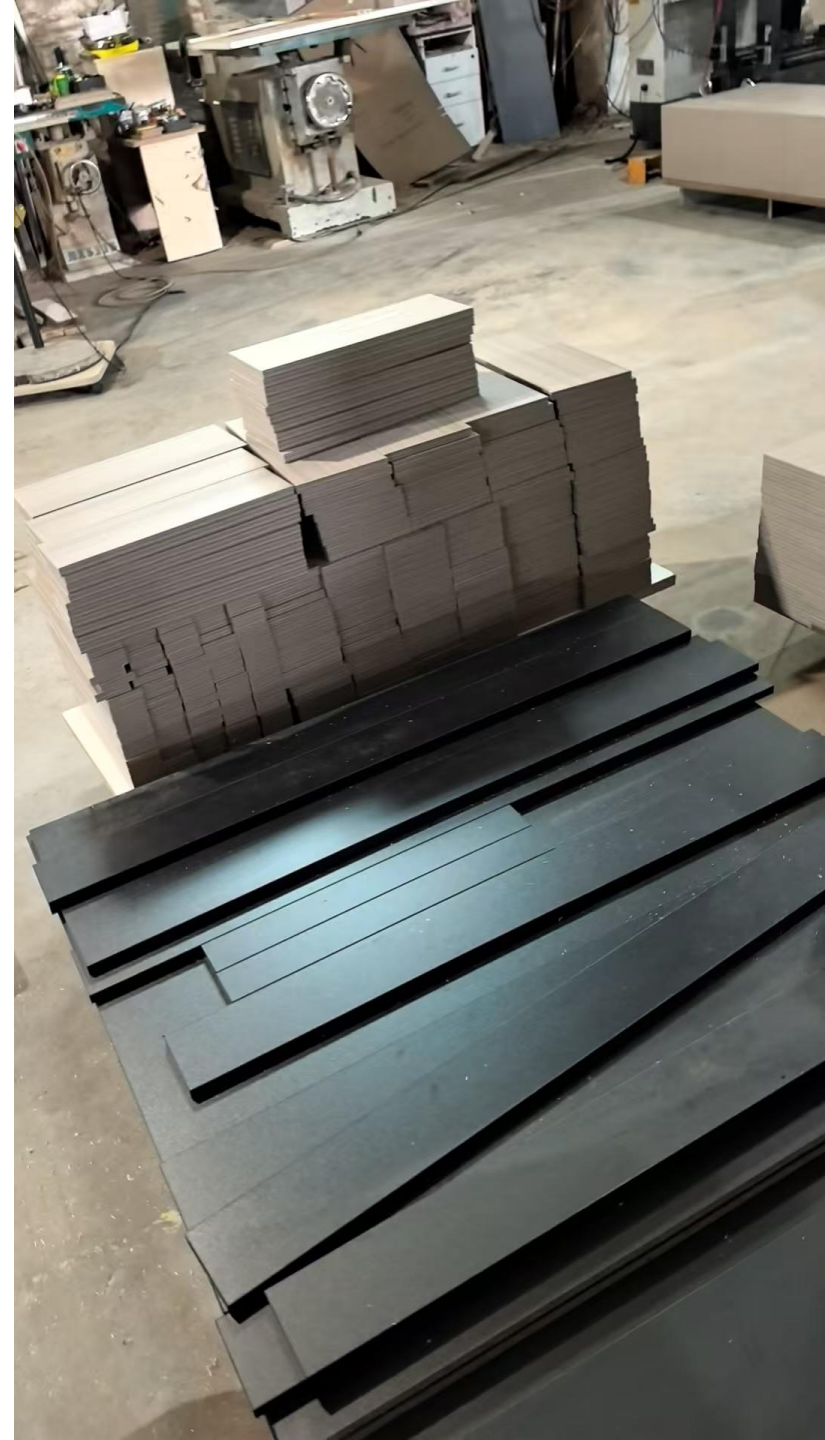

Solution

- Modular U-shaped bar: 5000×3500mm
- Orange fireproof board top + black powder-coated steel cabinet
- 5-hole socket + USB, hidden cable management
- Matching metal-frame bar stools (orange cushions)
- Knock-down wooden crate + 5-layer carton

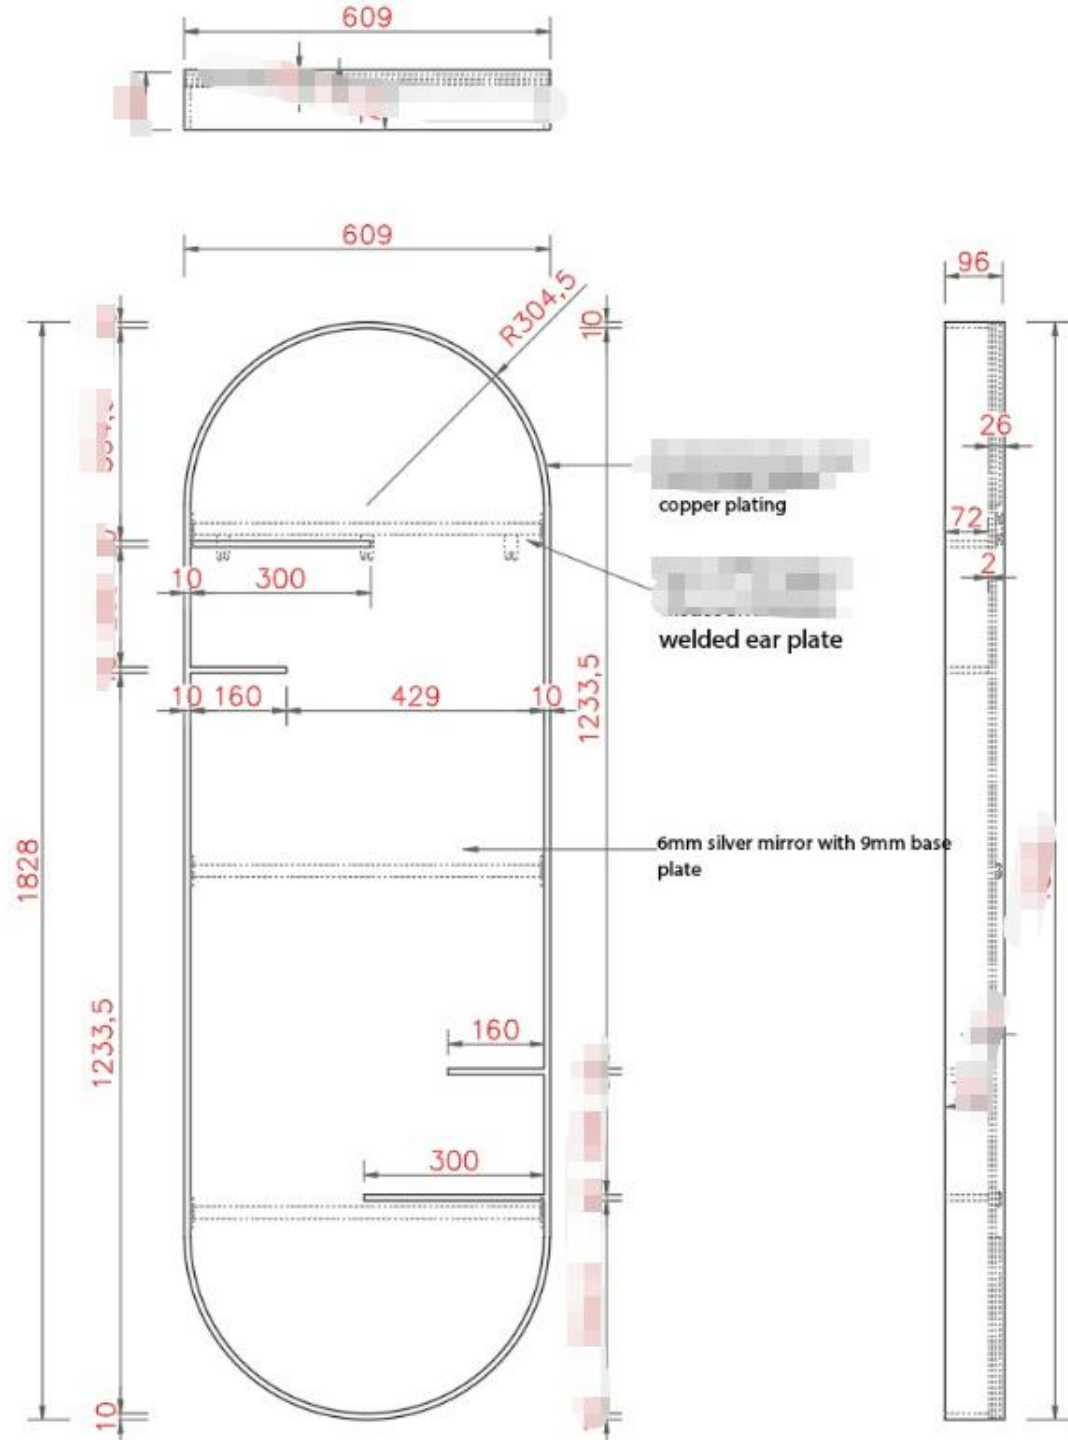

Results

- Production: 18 days (incl. sampling)
- Shipping: Full container by sea to Australia
- Client self-installed; feedback: "Precise dimensions, smooth installation."
- Follow-up order placed

- **Shipping to Miami, USA**
- In early 2025, a Miami interior designer commissioned a custom oval mirror for a private villa entryway—**nearly 1.8m tall, with antique-bronze frame, hidden wall mount, and display shelves.**
- After 2 sampling rounds and 15 days production, we built reinforced packaging (wooden crate + 5-layer corrugated + foam) and shipped from Shenzhen Shekou Port, arriving at the Port of Miami in 35 days.
- **Client feedback: “The installation fits the space perfectly.”** She later referred 2 new projects.
- Key Data: 2 samples | 15 days production | 35 days shipping | Shenzhen → Miami

Black Aluminum Matte Adjustable Dining Pendant Light_Custom Case Study · U.S. Client

Client Need

A modern dining room needed a pendant light that was both designed and functional:

- Black aluminum matte finish, premium look
- Adjustable arms for different dining scenarios
- Layered lighting: main + decorative
- Stable structure, easy installation

Solution

Centered on an "adjustable curved structure":

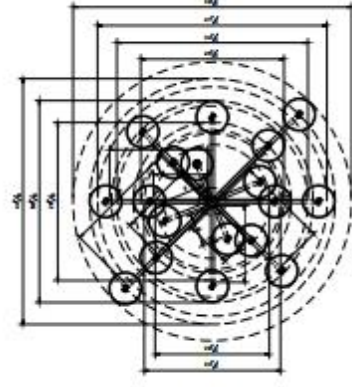

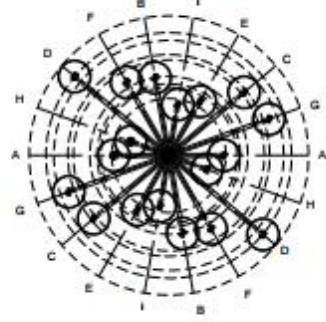

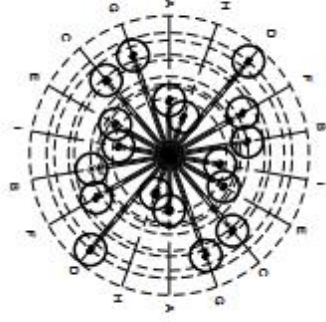

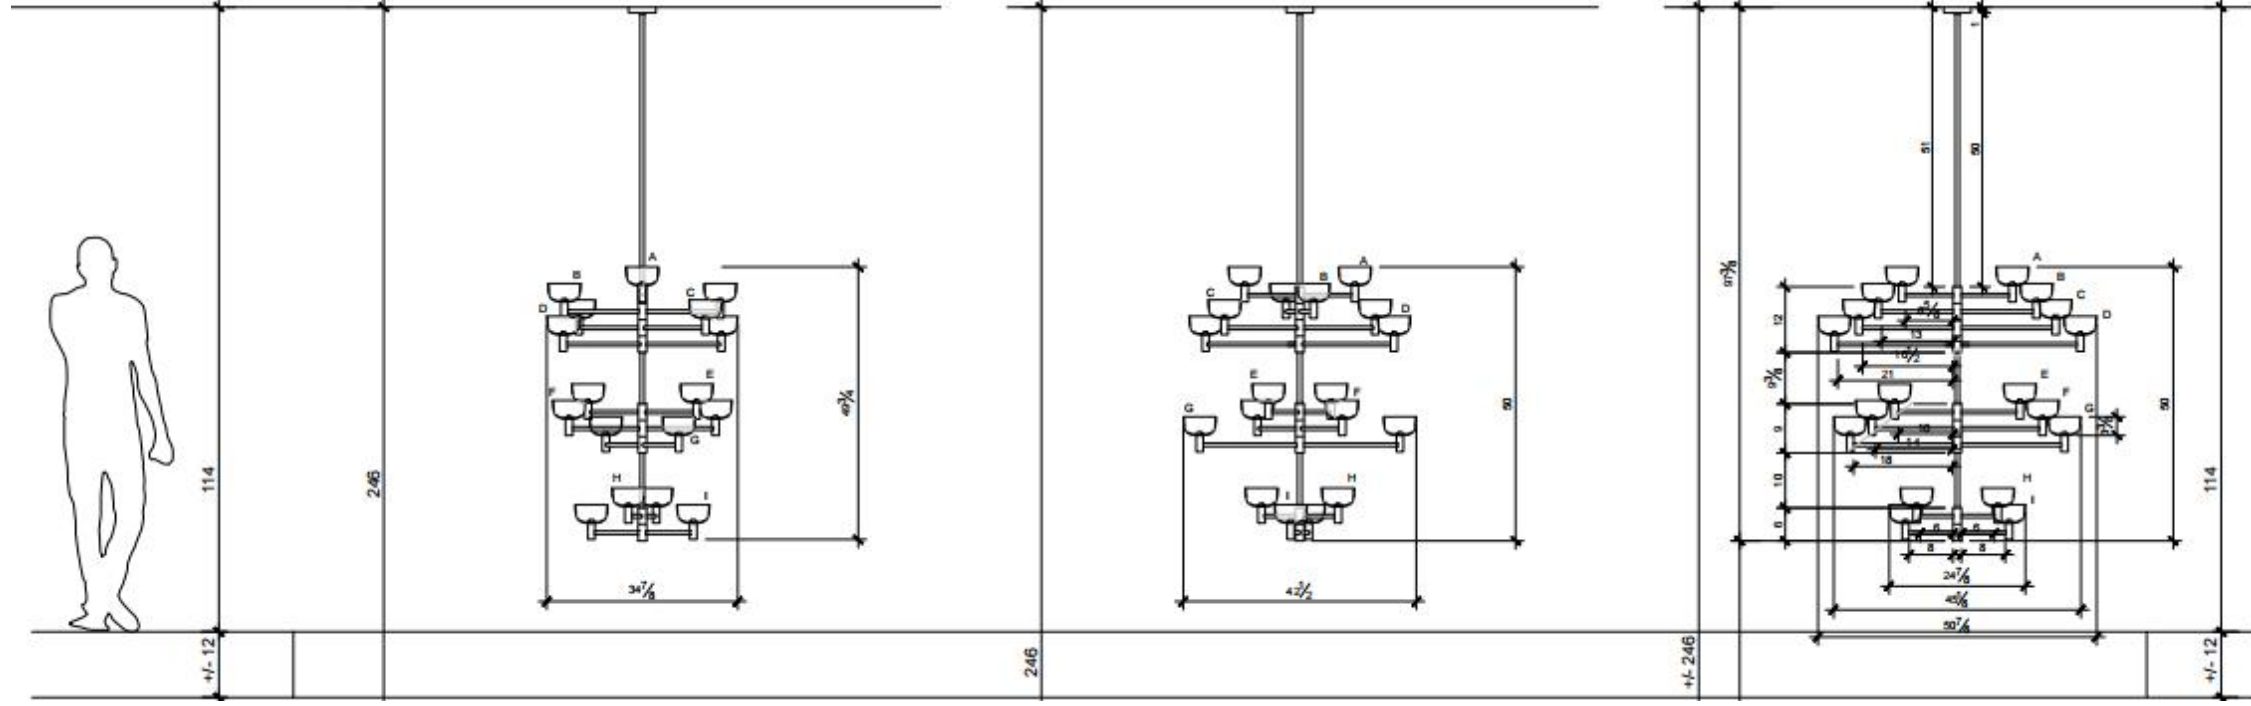

- Black aluminum matte body, scratch-resistant**
- Main arm + adjustable secondary arm for flexible angles**
- Main downward light + small decorative pendants**
- Glass rod accents for softer light diffusion**

Results

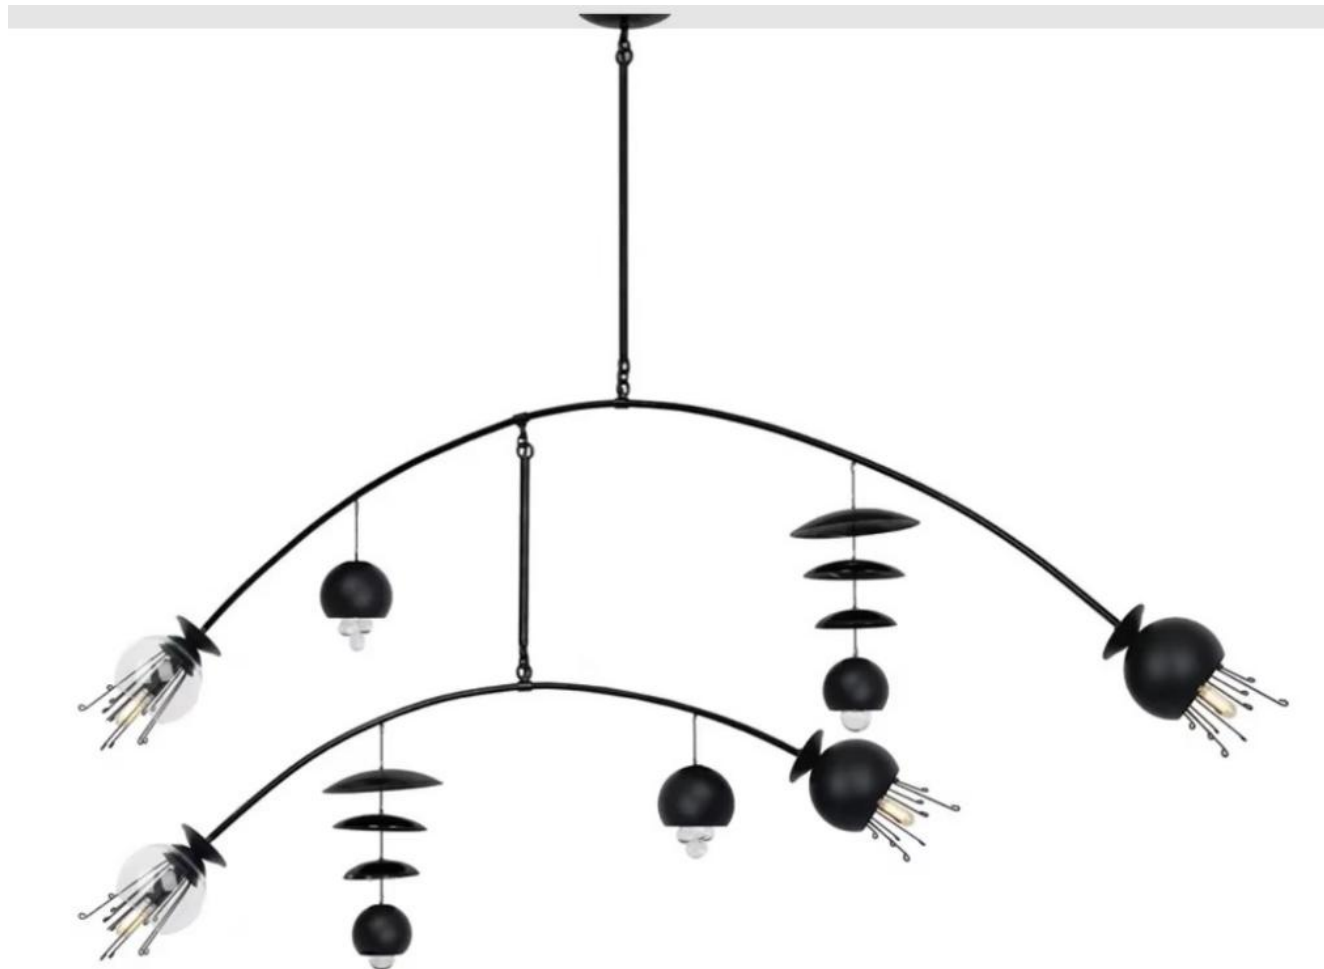

- Lead time: approx. 20 days
- Client self-installed; feedback: "Smooth adjustment, stable structure."
- Became the dining room centerpiece
- Recommended to other projects

Client Feedback

"This light isn't just illumination—it makes the dining room feel more designed."

Curved Arc Pendant Light

Custom Case Study · European Client

Highlights

Smooth curved tubing with elegant arcs; classic red-and-white contrast

Mid-century / vintage cream style; a statement piece for living or dining rooms

Artistic presence that elevates the space effortlessly

Solution

Body: Red metal curved tubing, matte coating, scratch-resistant

Shades: Frosted white glass globes for soft, even light

Structure: Multi-arm symmetrical design, visually lightweight

Installation: Ceiling-mounted, stable and clean

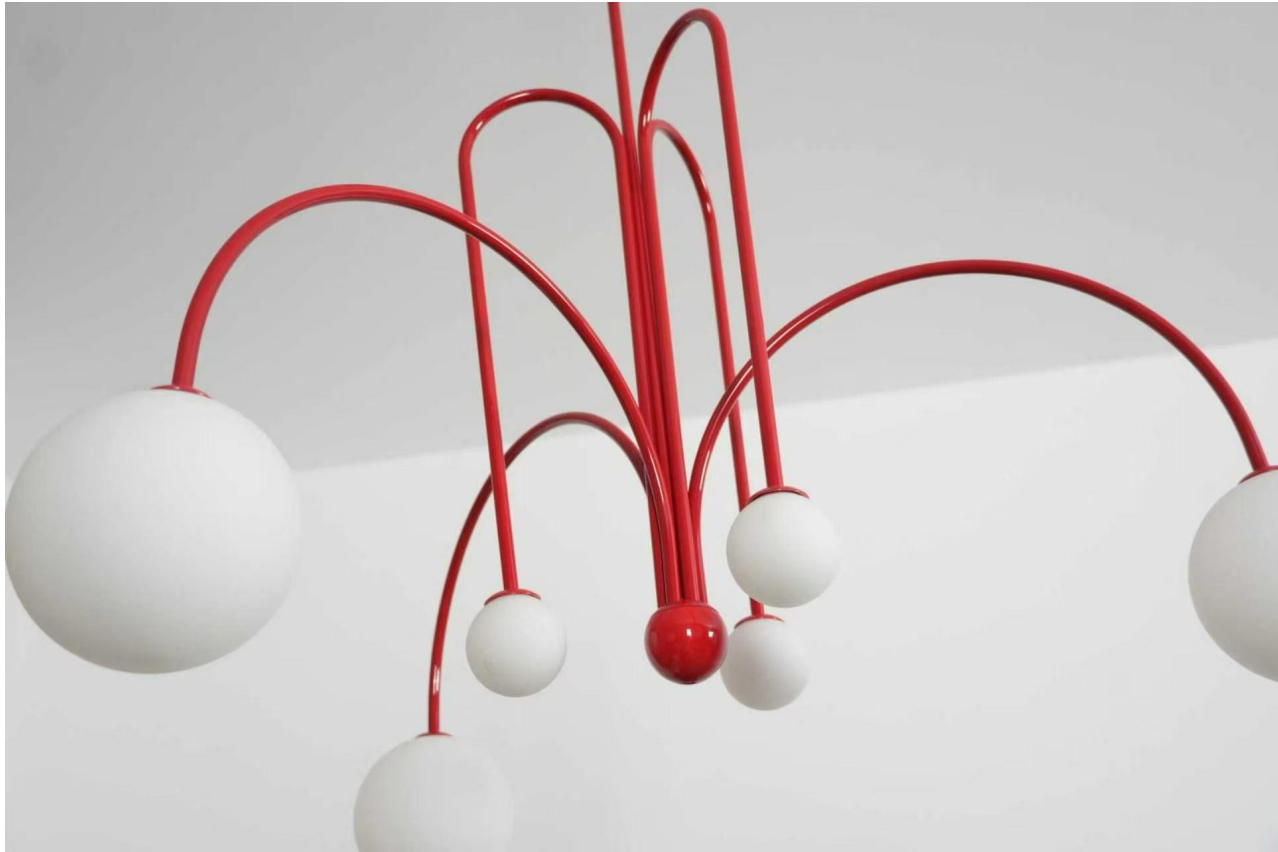

Results

Design to production: approx. 15 days

Final product as shown; client feedback: "Even better texture than expected."

Became the visual focal point, adaptable to vintage and modern interiors

Follow-up order placed for matching series

Gold Glass Globe Molecular Chandelier

Custom Case Study · U.S. Client

Highlights

- Gold metal branches with multiple glass globe shades
- Molecular radial structure, visually light and layered
- Ice-crack glass texture for soft, diffused light
- Suitable for living rooms, dining rooms, lobbies, and commercial spaces

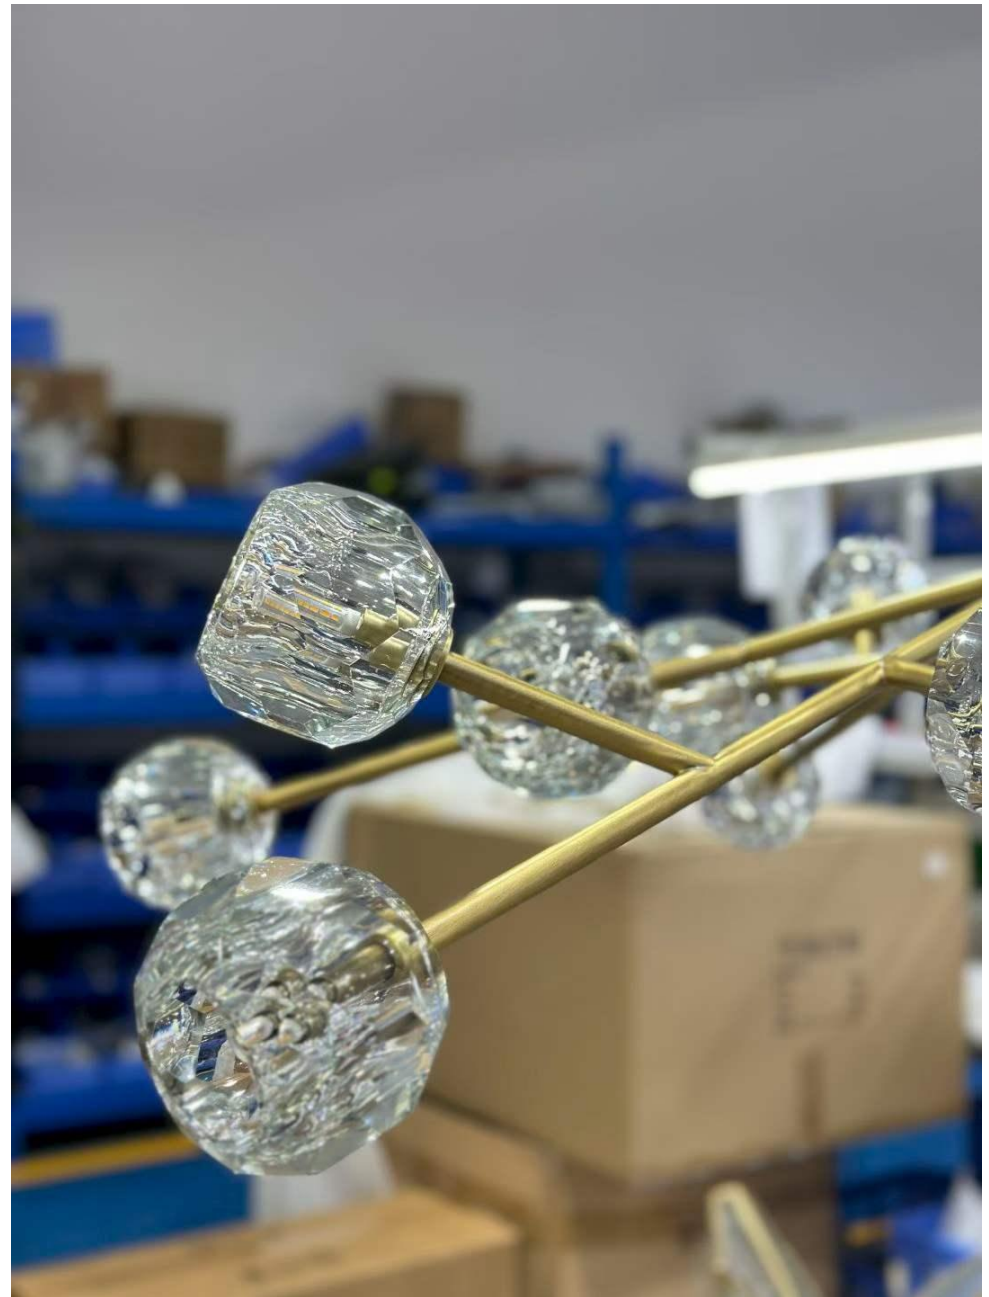

Solution

- Body: Gold electroplated metal branches, anti-oxidation, scratch-resistant
- Shades: Ice-crack glass globes, soft light, premium texture
- Structure: Multi-arm radial design, customizable to space
- Light Source: LED warm light, energy-efficient and durable

Results

- Design to production: approx. 15–20 days
- Final product as shown in factory photos
- Fits modern, light luxury, and mid-century styles
- **Client feedback: "Texture exceeded expectations."**

Outdoor Folding Chair

Custom Case Study · U.S. Client

Highlights

- X-shaped folding structure; opens instantly, stores easily
- Dark solid wood frame + beige leather seat, premium texture
- Metal anti-slip feet, suitable for both indoor and outdoor use
- Mid-century vintage design for patios, terraces, and resort spaces

Solution

- Frame: Dark solid wood (customizable wood and finish)
- Seat: Beige leather (material and color customizable)
- Structure: X-shaped cross folding; stable when open, lightweight when folded
- Details: Reinforced metal joints, anti-slip feet

Results

- **Design to production: approx. 15 days**
- **Suitable for outdoor leisure, patios, hotels, and resorts**
- **Client feedback: "Smooth folding, solid quality."**
- **Follow-up order placed for matching series**

Modern Minimalist Outdoor Lounge Chair

Custom Case Study · U.S. Client

Highlights

- Black metal frame + beige fabric seat, modern minimalist style
- Streamlined armrests, ergonomic design for comfortable seating
- Wide backrest and seat for extended relaxation
- Suitable for both indoor and outdoor use: patios, gardens, hotels, commercial spaces

Solution

- Frame: Black metal tubing, powder-coated, rust-resistant and weather-resistant
- Seat & Back: Beige fabric, customizable material and color
- Structure: A-shaped diagonal support, stable and durable
- Details: Curved armrests for arm support, wide seat for comfort

Results

- Design to production: approx. 15 days
- Final product as shown in photo, clear craftsmanship details
- Fits modern minimalist, Nordic, and mid-century styles
- **Client feedback: "Comfortable seating, solid structure."**
